PROFESSIONAL SUMMARY

Computer Science student with practical experience in Python, data analysis, and building AI powered applications. Experienced in building full stack Application Development using Django and integrating AI capabilities for realworld impact. Eager to contribute to innovative projects and grow as a developer or data analyst in a dynamic team environment.

EDUCATION

Bachelors in Computer Science (2022 – 2026)
Federal Urdu University of Arts, Science and Technology — Islamabad, Pakistan

Matric / ICS
Army Public School and College Rawat — Islamabad, Pakistan

WORK EXPERIENCE

Data Analyst (Oct 2025 – Apr 2026)
TechByte Solutions

- Collected, cleaned, and analyzed datasets using Python (Pandas, NumPy) to uncover trends and deliver actionable insights for client decision making.
- Built data visualizations and summary reports using Matplotlib and Excel, presenting findings in a clear, business friendly format.
- Developed predictive models using Scikit-learn for forecasting and pattern recognition, supporting data-driven strategies across agriculture and retail sectors.

Freelance Web Developer
Various Clients

- Delivered custom WordPress websites for clients across different industries, handling full-cycle requirements gathering, design, and deployment.
- Built and customized WooCommerce stores, landing pages, and portfolio sites with focus on speed, mobile responsiveness, and SEO best practices.

PROJECTS

AgriBazaar | Python, Django, PostgreSQL, HTML/CSS, JavaScript, Pandas, NumPy

- Full stack Django marketplace connecting farmers and buyers across Pakistan with real-time AI-driven crop price analysis and multi month forecasts.
- Integrated a live weather API to adjust price predictions based on temperature, rainfall, and flood/drought risk, built predictive models enabling data driven decisions for agricultural stakeholders.

Pocket Mind| Python, PostgreSQL, Django, React, Celery

- Developed an AI-powered voice app that captures raw ideas in seconds, then runs them through an LLM pipeline to extract hidden assumptions and flag risks, before a single hour is spent on execution.

MapLeads| HTML, CSS, JS, Python, Panda, Selenium

- Built an Automated Lead Generation tool that scrapes Business details from Google Maps based on niche and location inputs, export structured data to csv and uses an AI-powered chatbot to generate personalized cold emails

TECHNICAL SKILLS

Languages & Web: Python, HTML, CSS, JavaScript, C#
Frameworks: Django, WordPress, React
Libraries: Pandas, NumPy, Scikit-learn, Matplotlib
Databases & Tools: MySQL, SQLite, PostgreSQL, REST APIs, Git
AI & Other: SEO, Prompt Engineering, AI Integration, LLM, Predictive Modelling, Graphic Designing, Social Media Marketing
